

Scientific Research Project

CIMI will support scientific research projects (of 2 years duration) in mathematics, computer science or in areas of interaction between both. These projects will represent unique opportunities to enhance scientific selected activities and to disseminate knowledge. The CIMI may fund up to 20 000€ for each elected project.

- The coordinator of the project has to be a member of either IMT, IRIT or LAAS (MAC, ROC, SARA, TSF and VERTICS teams).
- The project should be presented according to the guideline proposed below, and submitted before the yearly deadline (usually in May).
- Submitted projects will be assessed by members of CIMI Prospective Committee. CIMI will request additional expertise from external scientific experts.
- Project holders will be notified by email (usually by the end of September). A summary of the evaluation of their project will be provided.

The holders of selected projects will have to provide a short report at the end of the two years, including the impact of this project on their research activity.

A scientific report will have to be send at the end of the projet.

Every publication related to the project will include the following acknowledgement:

*This work was supported by the ANR LabEx CIMI (grant ANR-11-LABX-0040)
within the French State Programme "Investissements d'Avenir".*

Requested information

Project Title & Applicant:

Part I. Brief summary of the project (10 lines):

Part II. Detailed general information:

- Project participants and resume of the coordinator
- Other current source of fundings and positioning of the application with respect to the latter (for example Aniti, ANR, ERC projects, ...)
- Project timeline

Part III. Full description of the project (max 5 pages):

- Problems and scientific interests, brief bibliography
- Possible interactions between mathematics and computer science (if any)
- Scientific program and milestones

The program should include the planned activities, the names of possible invited scientific experts (if any) and their fields of expertise (brief resume).

- Expected outcome

Scientific, pedagogical, industrial, international, partnerships, ...

Part IV. Detailed budget

Examples of eligible expenses:

- travel expenses (missions, invitations, visa)
- workshop organization
- internships
- small equipment (limited to 1000€ excluding VAT): books, laptops, audio-visual and computational resources, software licenses, ...

Describe any possible co-fundings.
